Federal Communications Commission  
445 Twelfth Street, SW  
Washington, DC 20554

**RE:** iPhone, Inc. 911 Compliance Status Report, WC Docket No. 05-196

Dear Ms. Dortch,

I am writing on behalf of iPhone, Inc. ("iPhone"), a provider of managed Voice over Internet Protocol ("VoIP") services on a retail to end-user subscribers in response to the March 12, 2007 letter ("Letter") from Ms. Kathryn S. Berthot requesting that iPhone submit a report which provides an update to iPhone's 911 Compliance Status. Ms. Berthot's letter read in part as follows; "The Enforcement Bureau of the Federal Communications Commission (Commission) is directing certain interconnected Voice over Internet Protocol (VoIP) service providers to submit a report detailing their current status of 911 compliance. Our review of your Compliance Letter indicates that, as of November 28, 2005, you were not, or had not provided sufficient information to indicate that you were, providing fully compliant 911 service to 90 percent or more of your subscribers, pursuant to the rules adopted by the Commission in its VoIP 911 Order. Accordingly we direct you to submit a report no later than April 11, 2007."

Per Ms. Berthot's letter, iPhone's status report must include the following information:

Provision of Compliant 911 Service: A *quantification*, on a *percentage* basis, of *the* number of *subscribers* to whom you are able to provide 911 service in full compliance with the rules established in the VoIP 911 Order.

911 Coverage: To the extent you have not achieved full 911 compliance with the requirements of the VoIP 911 Order in all areas of the *country* in which you are providing *interconnected* VoIP *service to subscribers*: (i) list each PSAP serving such areas of the country; and (ii) describe in detail your plans for coming in full compliance with the requirements of the order, including your anticipated *timeframe* for such compliance.

911 Routing Information/Connectivity to Wireline E911 Network: Provide a statement as to whether you *are transmitting*, as specified in Paragraph 42 of the VoIP 911 Order, 'all 911 calls to the *appropriate* [public Safety Answering Point (PSAP)], designated statewide *default* answering point, or appropriate local emergency *authority* utilizing the Selective Router, the trunk *line(s)* between the Selective Router and the PSAP, and such other elements of the *Wireline E911* Network as are *necessary* in those areas where Selective Routers are utilized.' If you are not *transmitting* all 911 calls to the *correct* answering point in areas where Selective Routers are utilized, *this* statement should include: (i) a quantification, on a *percentage* basis, of the number of *subscribers* whose 911 calls *are* not *currently* being routed to the *appropriate* PSAP via the dedicated Wireline *E911* Network; and (ii) a detailed explanation why not.

New VoIP Customers and/or Marketing of VoIP Service in Non-Compliant Areas: *Significantly*, some providers such as AT&T and Verizon have committed to not accepting new customers in areas where the provider cannot provide 911 service. *State* whether you have stopped accepting new customers and marketing your VoIP service in *non-compliant* areas, and, if so, the date on which you stopped. If you have *continued* to *accept* new customers for its service and/or market your VoIP service in areas where you are noncompliant, explain how these actions are consistent with the Commission rules. Further, indicate *the* overall number of subscribers in each

of your noncompliant areas, and the number of those subscribers that received their *initial* service after November 28, 2005.

This 911 compliance status report letter provides background information about iPhone, and the response to each of the specific information requests as outlined in Ms. Berthot's letter.

As noted in iPhone's November 28, 2005 911 Compliance Letter for E911, iPhone is an interconnected VoIP service provider and a wholly owned subsidiary of Unity Communications, Inc. ("Unity") which offers managed VoIP services on a retail basis to end-user subscribers. iPhone's wholesale provider of hosted VoIP services is New Global Telecom ("NGT"). iPhone's customers are primarily small and medium commercial enterprises along with a small number of residential accounts that were assumed from another VoIP service provider in mid-August 2005. iPhone is relying upon NGT's "SafeCall® E-911 Service" which primarily utilizes Intrado's 911 network capabilities, but may also utilize services provided by other Emergency Service Gateway Providers (ESGWs) to provide a compliant E-911 service for VoIP 911 calls. iPhone is entirely reliant upon the 911 solution that NGT and Intrado have jointly devised and implemented.

### **I. Provision of Compliant 911 Service**

Provision of Compliant 911 Service: A quantification, on a *percentage* basis, of the number of *subscribers* to whom you *are* able to provide *911 service* in full compliance with the rules established in the **VoIP 911 Order**.

The first of these bullet points requires information regarding the quantification, on a percentage basis of the provider's end-user subscribers to whom the provider is able to provide 911 services in compliance with the rules established in the **VoIP 911 Order**.

On a percentage basis, 95.45% of iPhone's subscribers have been provided with Enhanced 911 service and an additional **0.83%** of iPhone's subscribers have been provided with Basic 911 service, for a total of **96.28%** in full compliance with the rules established in the **VoIP 911 Order**.

NGT has reported to iPhone that as of April 6, 2007, NGT has a fully compliant E-911 service, available for approximately 91% of its current Service Provider's VoIP end-users, a portion of which are iPhone's end-users. An additional 1.5% of NGT's Service Provider's current end users have compliant basic 911 services. The remaining 7.5% of NGT's current Service Provider's VoIP end-users have non-compliant coverage for E-911 due to the unavailability of compliant coverage from iPhone's and NGT's underlying 911 service provider, Intrado.

NGT has advised iPhone that delays with Intrado's rollout of 911 services can be attributed to issues with:

- Jurisdictional ESN level routing expectations
- RBOC Selective Routing interconnection
- Stand Alone ~~Selective~~ Routing interconnection
- Selective Router-serviced by stand alone Automatic Location Identification system
- VoIP E911 shell records
- PSAP responsiveness

### **2.911 Coverage**

911 Coverage: To the extent you have not achieved *full* 911 compliance *with* the *requirements* of the **VoIP 911 Order** in all areas of the *country* in which you are providing *interconnected VoIP*

service *to subscribers*: (i) list each PSAP serving such areas of the country; and (ii) *describe* in detail your plans for coming in full compliance with the **requirements** of the order, including your *anticipated timeframe for such compliance*.

The second of these bullet points requires a list of PSAP where service is provided but does not yet have coverage and a description of the plan to come into full compliance with the requirements of the order for PSAPs not yet covered.

In NGT's 911 deployment status report provided to iPhone on March 23, 2007, NGT advised that 4,558 PSAPs interconnections have been deployed, or 74.7% of the 6,104 Primary Wireline PSAPs, which reportedly represents 100% of the Primary Wireline PSAPs nationally. NGT's and Intrado's 911 rollout plan does encompass all 6,104 of these PSAPs, although target deployment dates have not been established by NGT and Intrado for all remaining non-compliant PSAPs. NGT has advised that the 1,546 remaining PSAPs serve a small percentage of the remaining lines in the United States that do not have E911 coverage.

NGT has advised iPhone that 91% of the VoIP-originated 911 calls which are transmitted over NGT's SafeCall E-911 Service within NGT's E-911 coverage area ("Coverage Area") via the appropriate Selective Routers and other components of the Wireline E-911 Network. Regarding the Telephone Numbers ("TNs") not currently covered by NGT's SafeCall E-911 Service 24% of the TNs are classified as "grandfathered" since they were activated prior to November 28, 2005.

Item (i): **Exhibit A** details NGT's and Intrado's reported PSAP coverage areas and delays in coverage as of March 23, 2007. Target deployment dates have been noted in this Exhibit for a number of non-compliant PSAPs.

Item (ii): **Exhibit B** contains the rolling 30-day forecast for 188 near-term PSAP deployments as provided to iPhone by NGT and Intrado as of March 23, 2007. NGT and Intrado have yet to advise iPhone of the targeted deployment dates for the remaining 1,358 PSAPs.

iPhone relies upon NGT which in turn relies on Intrado to do the necessary work required to prioritize, schedule, coordinate, test, turn up and deploy new PSAPs in a timely manner to support E911 service.

Further detail regarding areas of the country in which iPhone is specifically providing interconnected VoIP service, but has not yet achieved full 911 compliance follow:

PSAP - Raleigh County Emergency Services

Raleigh County, WV

PSAP is capable of supporting Enhanced 911 services

NGT/Intrado Target Deployment Date: 06/08/07

All of the in-service TNs served by this PSAP are ~~classified~~ as "grandfathered" since they were activated prior to November 28, 2005.

PSAP - Regional Public Safety Communications Center-Boyd County

Boyd County, KY

PSAP is capable of supporting Enhanced 911 services

NGT/Intrado Target Deployment Date: None furnished to iPhone as of 04/10/07

All of the in-service TNs served by this PSAP are assigned for internal use by Unity Communications, iPhone's parent company, and are classified as "grandfathered" since they were activated prior to November 28, 2005.

PSAP – Lauderdale County E911 Center  
Lauderdale County, MS

PSAP is capable of supporting Enhanced 911 services  
NGT/Intrado Target Deployment Date: 05/11/07

The in-service TN served by this PSAP constitutes a small portion of a larger and otherwise 911-compliant installation for one particular end-user completed prior to November 28, 2005. Additionally, this TN is provisioned for inbound calls only and cannot be utilized for any outgoing calls or for 911 calls. As noted above, the target PSAP deployment date is 05/11/07.

PSAP – New Boston Police Department  
Scioto County, OH

PSAP is capable of supporting Basic 911 services  
NGT/Intrado Target Deployment Date: None furnished to iPhone as of 04/10/07

All of the in-service TNs served by this PSAP are assigned for internal use by Unity Communications, iPhone's parent company, and are classified as 'grandfathered' since they were activated prior to November 28, 2005. Additionally, these numbers are provisioned for inbound calls only and terminate into an auto-attendant, and hence cannot be utilized for any outgoing calls or for 911 calls.

### 3.911 Routine Information/Connectivity to Wireless E911 Network

911 Routine Information/Connectivity to Wireline E911 Network: Provide a statement as to whether you are *transmitting*, as specified in Paragraph 42 of the VoIP 911 Order, "all 911 calls to the appropriate [public Safety Answering Point (PSAP)], designated statewide *default* answering point, or *appropriate* local emergency authority utilizing the Selective Router, the *trunk line(s)* between the Selective Router and the PSAP, and such other elements of the *Wireline E911 Network* as are *necessary* in those areas where Selective Routers are utilized." If you are not transmitting all 911 calls to the *correct* answering point in areas where Selective Routers are utilized, this statement should include: (i) a quantification, on a *percentage* basis, of the number of *subscribers* whose 911 calls are *not currently* being routed to the *appropriate* PSAP via the dedicated *Wireline E911 Network*; and (ii) a detailed explanation *why* not.

The third of these bullet points requires a statement as to whether NGT is transmitting, as specified in Paragraph 42, the VoIP 911 calls to the appropriate PSAP.

NGT requires iPhone and its other service provider customers to provide the end user address before service can be ordered and established. Once a valid address is provided, VoIP service is provisioned for areas that have 911 coverage. The customer call back number and the current registered address of the end user is sent with every 911 call. The use of the information transmitted to the PSAP for each call is dependent on the ability and the equipment of the PSAP to accept and process the call in a manner which makes the information transmitted with each call meaningful and actionable by the public safety community.

The Letter also requests the following information: (i) a quantification, on a percentage basis, of the number of subscribers whose 911 calls are not currently being routed to the appropriate PSAP via the dedicated Wireline E911 network; and (ii) an explanation of why the provider is not transmitting 911 calls via the dedicated Wireline 911 network. In response, NGT submits as follows:

Item (i): NGT has advised iPhone, that according to Intrado, currently 93% of the U.S. population is served by PSAPs operating off an E9-1-1 Selective Router. iPhone respectfully submits that it lacks the information needed to respond specifically because, as noted above, iPhone depends on NGT and ultimately Intrado for connectivity to Selective Routers, and does not have direct information regarding the percentage of PSAPs that are capable of receiving and processing ANI and Registered Location information within the Coverage Area.

Item (ii): NGT has reported to iPhone, that as of April 5, 2007, NGT's SafeCall E-911 Service is transmitting the 911 caller's ANI and Registered Location to all PSAPs in its Coverage Area that are capable of receiving and utilizing location information.

#### 4. New VoIP Customer and/or Marketing of VoIP Services in Non-Compliant Areas

**New VoIP Customers and/or Marketing of VoIP Service in Non-Compliant Areas:** Significantly, some providers such as AT&T and Verizon have committed to not accepting new customers in areas where the provider cannot provide 911 service. Still, the providers are accepting new customers and marketing VoIP service in non-compliant areas, and, if the date on which you become a customer is continued to accept new customers for its service and/or market your VoIP service, you are in violation of how the rules are consistent with the Commission rules. Furthermore, the Commission has stated in one of your non-compliant areas, and the number of those businesses that received their service is 28, 5.

NGT and NC by extension stopped accepting orders for new customers in areas not covered by the 911 waiver release. If service is requested in a non-covered area, the requesting service provider cannot activate that 911 coverage is not available and that service can not be activated for the request area to NGT.

NGT does support a process that allows you and its other service provider customers to sign a 911 waiver release for activation of new service in areas not covered by NGT and Intrado's VoIP 911 service provider. This was deemed necessary by NGT and appropriate since some of the service provider customers may choose to contract with a third party outside of NGT or Intrado for VoIP 911 service. The service provider may choose to build out its own VoIP 911 service to cover the area. In this case, the service provider would have no understanding of the third party engaged and put in place by its service provider customer and the service provider would take responsibility for providing 911 coverage on its own and that would be independent of NGT SafeCall E-911 service.

As noted previously, iPhone is not involved in the 911 solution that NGT and Intrado have jointly devised and implemented, and in the interim, the information that NGT has provided to iPhone from time to time. iPhone has not implemented its own solution for VoIP 911 services, nor has it contracted with a third party outside of NGT or Intrado for VoIP 911 services.

#### Conclusion

In sum, iPhone and its wholesale provider of hosted VoIP services, NGT, continue to make significant progress toward full compliance with the requirements of the VoIP 911 Order, and continue to work diligently to complete the deployment of PSAP interconnections throughout the country.

If you have any questions or need further information, please contact the undersigned.

Respectfully Submitted,

B	PSAP is or has the ability to only support Basic 911 capabilities
Being Determined	In process of confirming PSAPs capabilities
Wireline PSAP Type Key	
P	A primary PSAP that would receive wireline calls.
Date	Deployed
4558	Up 53 PSAPs over last report

**30 Day Outlook Highlights:** For more information refer to Tab 2

Targeted PSAPs for this week include PSAPs in CO, MD, MT, NE, FL and IA.

Circuit Orders - There are pending orders with Sprint, ATT, and BST. ESN's have been accepted in various Verizon regions, and we are working to escalate the turn-up and receipt of the necessary information for other circuits. Verizon has been responding to escalation, and are beginning to provide information needed for circuit turn-up.

Bell South direct connect  
Chicago IL testing in progress.

**Planned Expansion:**

**IMPORTANT:** Any future dates provided are estimates and are not committed. Build out to specific PSAPs is subject to change.

This list is meant to communicate current plans and does not commit NGT to building out any of these areas. This is a NON BINDING roll-out for 6DegreesIP SafeCall Service.
